(a) Max cost, open line
(b) Max cost, blocked zones
(c) Social cost, blocked zones
worst-case ratio, optimum inside interval
interval width ω (normalised by optimal cost)
1 + min(ω, 1)
1 + min(ω/2, 1)
min(1 + 2ω, 3)
min(1 + ω, 3)
Median* (ignores prediction)
