(a) Average day (in distribution)
Median*, no prediction
CenterMinMaxP* (CQR)
Rand-centre (CQR)
IntervalClamp* (CQR)
MinMaxP*, point prediction
mean ratio (max cost)
miscoverage level α
(b) Worst day (after distribution shift)
MinMaxP*, point prediction
Median*, no prediction
worst ratio over 3,000 days
miscoverage level α
(c) Coverage and per-day certificate
1 – α
coverage, in distribution
certificate holds, in distribution
coverage, after shift
certificate holds, after shift
share of days
target coverage 1 – α
